PROJECTS :-

MINOR PROJECTS :

AI-Powered UI Component Library (Shadcn-style) | [Github Repo] | [Live project] (Time to complete)

Tech Stack: React, TypeScript, OpenAI API, Tailwind CSS, Radix UI, NPM Package

Problem: Developers waste hours building repetitive UI components from scratch.

Impact: Open-source NPM library - describe a component in plain text, get production-ready React + Tailwind code instantly.

DevOps CI/CD Pipeline on AWS | [Github Repo] | [Live project] (Time to complete)

Tech Stack: AWS CodePipeline, CodeBuild, CodeDeploy, GitHub Actions, CloudFormation, Terraform, S3

Problem: Manual deployments are slow, error-prone, and don't scale.

Impact: Fully automated build → test → deploy pipeline on AWS. Deployment time cut from 30 mins to under 4 mins.
